California. Drought.gov. (n.d.). Retrieved March 2, 2023, from <https://www.drought.gov/states/california>

Columns:

D0- Abnormally Dry

D1- Moderate Drought

D2- Severe Drought

D3- Extreme Drought

D4- Exceptional Drought

Why is this important?

- This data set shows drought levels in the state of California. It is broken up into five different sections the darker the color the worse the drought is. This is important to know because we know the trend of where and when the drought will be the worst. We can begin to prepare and try to fix the problem. It also tells us where crops might not grow the best, and where wildfires might be problematic. This data can help people that live in California better prepare for droughts and wildfires.
